This is a dumb blog post test of orgmode. Orgmode docs are directly rendered on github repos and can be dumped to static html easily.

1.1 How do they look?

```
NB. j code: https://www.jsoftware.com/
load'plot'
plot (2 o. 0.1*i.420) ,. 1 o. 0.1*i.420
```

1.2 So pretty bad by default apparently

1.2.1 TODO Export with mediawiki style

See this glorious example: https://en.wikipedia.org/wiki/List_of_mathematical_symbols_by_subject
